HB-545, SB-425 – Prescription Monitoring Program This would require your medical records to be provided to the state police for many prescription medicines, including: cough syrup, tranquilizers, sleeping pills, headache medicine, mild pain control and stronger pain control medicine. The state police would receive:

- 1. The recipient's name and address.
- 2. The recipient's date of birth.
- 3. The covered substance that was dispensed to the recipient.
- 4. The quantity of the covered substance that was dispensed.
- 5. The date of the dispensing.
- 6. The prescriber's identifier number.
- 7. The dispenser's identifier number.
- 8. Any other information required by the State Police regulations.

Other legislation that you may wish to oppose:

HB-324 – The "Archie Bunker bill" This bill is heralded as a get-tough measure but it creates a two-year statute of limitations on lawsuits against drug dealers, replacing the terms available under existing common law.

under existing common law. Typical grandstanding gone wrong or protection for dealers, you decide.

SB 653 Requires the court to retain records of fingerprints and DNA of non violent juveniles even with no determination of guilt.

HB 269 Makes it easier for prosecutors to make conspiracy charges.

Note:

Leading criminologists have determined that there is no relationship between incarceration rates and drug crimes. Therefore, legislation establishing a special penalty zone and other increases in prison and jail time will waste law enforcement resources and are only "politically" useful.
